Introduction

Chandigarh Smart City Proposal (SCP) has been selected to implement the Area Based Development (ABD) and pan-city proposals by Government of India (GoI) under Smart City Mission (SCM). Chandigarh SCP proposes smart solution in ABD and cross pan-city providing various Smart feature/infrastructure. TOD policy promotes NMT (Non-Motorized Transport) which is proposed. CSCL is the scheduled agency for implementation, O&M and management for Transport solution.

CSCL plans to introduce a Bike Sharing System to provide a low-cost, environmentally friendly mobility option to city residents. Bike sharing is a flexible system of personalized public transport. Bikes are available in a closely spaced network of semi-automated stations. Users can check out bikes at one station and return them to any other station within the network.

Bike sharing is a key element in a city’s strategy to expand the use of sustainable transport modes. Bike sharing is expected to boost the use of public transport by providing crucial last-mile connectivity to the all-area of city, thereby expanding the catchment areas for the region’s transit systems. By encouraging a shift to sustainable modes, the Bike Sharing System will reduce dependency on automobiles, reduce traffic congestion, vehicle emissions, and demand for motor vehicle parking. In addition, the system will expand the health and wellness benefits of Bike transport to new users. Finally, the system will support the transformation of streets to become free of safety hazards where pedestrians and bicyclists feel safe and comfortable.

The stations would cover the “catchment area” of the main roads, railway station and markets and other traffic congestion zones. This will ensure that the first and last mile connectivity to people living in the catchment area is provided for. Importance will be given to place stations near important commercial, cultural, educational, administrative, and residential and tourist attraction points in the catchment area.

A Hybrid System is proposed for Public Bike Sharing. The stations will be managed by station attendants; however the operations of each station are communicated to the Central control system by the station attendants using card verification devices. The central control system collects data from each station for efficient planning and operation of the system. This data is used to make decisions on redistribution of bikes around stations during the hours of operations. The Bike sharing system will also be integrated with the system of fare collection or Card through ITS to aid the multimodal integration.

The Bike Sharing System proposed will have 5000 (+/- 10%) bikes spread over minimum 500 stations across the city. The project will be implemented i.e. developed, operated and maintained by the Concessionaire within a time period of 10.9 years of signing the Agreement.

CSCL hereby requests interested Parties to respond to this call for Request for Proposal for the development, design, procurement, installation, operation and maintenance of the Bike Sharing System in the city of Chandigarh.

Project Structure, Source of Funds and Source of Revenue

- The Capital and Operational Cost of the project has to be borne by the Concessionaire. Capital costs includes total cost of the system—including stations, docks, bikes, redistribution equipment, the control center, and other equipment. Operation and
maintenance shall include the cost of operation, daily maintenance, repairing, spare parts, consumables and other expenses to be borne by the Concessionaire assigned the project including the marketing expenses to fulfill the service level standards under this RFP to internationally known standards. The concessionaire will be required to pay license fee (Negative) for all the bikes deployed in the Authorised Fleet or bikes in actual operation, whichever is more. The CSCL will be required to pay license fee (Positive) for all the bikes deployed in the Authorised Fleet or bikes in actual operation, whichever is less. The License Fee will be decided as per the financial bid of the successful applicant. The payments will be made on yearly basis. Detailed instructions on license fees to be paid by the Concessionaire to CSCL are given in this RFP document.

- The Concession period shall be for a period of 10.9 years from the date of signing of the agreement. This Concession period of 10.9 years is divided into two phases viz. first phase Development period of nine months from the date of signing of agreement, and second phase Operations and maintenance period of remaining ten years.

In case the Concessionaire fails to make the system operational in 9 months, the Concession Period shall start at the end of 9 months for a period of 10 years irrespective of the date of actual completion.

- The Concessionaire shall be entitled to retain Fare box revenue: Revenue earned from sale of memberships and rental income earned from renting of Bikes to the users under this RFP;

- The Concessionaire shall be entitled to retain Advertisement Revenue/ Sponsorship Contract Revenue: The concessionaire will be given the rights to sell advertisement space on the station/docking/bike system. This includes advertisement space on Bikes and station infrastructure like digital panels and docks at the station and redistribution vehicle. Alternatively, the concessionaire may sell sponsorship contract to the system to a single entity. For advertisement space refer clause 3.9 also.

- The technically qualified bidder whose financial amount is lowest, will be declared as Bidder.

- In case two or more technically qualified bidders have same financial bid, then in such case, the Preferred Bidder will be selected on the basis of highest turnover. Bidder quoting (8) would be L1
Bidder quoting (7) would be L2
Bidder quoting (6) would be L3

The Negative License Fee shall be followed by lowest Positive Fee followed by higher Positive License Fee requirement.

For Example: if the Positive License Fee quoted by various Bidders to the CSCL is (1), (2), (3) and (4) then:

Bidder quoting (1) would be L5
Bidder quoting (2) would be L6
Bidder quoting (3) would be L7
Bidder quoting (4) would be L8

- Further, a Bidder can only quote only one License Fee. Each of these License Fee could either be Positive License Fee or Negative License Fee but not both. The Security Deposit should be linked to the insurance amount of bikes and should not exceed an amount of Rs.250. Ideally the security deposit charged from each user should be the insurance amount/Bike. This will be charged for both subscription user/members as well as casual users for the length of their use/membership, at the end of which it would be returned, in case there has been no case of missing bikes attributed to the person’s account.

b) **User Fees:**

The fees users pay based on the amount of time bikes were borrowed, each time, before it is returned to the system
