A Smart City has different kinds of land uses in the city. This is a major challenge to achieve sustainable and inclusive urban development. The city government needs to engage with various stakeholders and address the needs of all residents.

Scenario 1 (BASE):

- It is important to provide a mix of land uses to ensure that the city is sustainable and inclusive. This can be achieved by creating mixed-use areas that combine residential, commercial, and recreational spaces.
- The city government can encourage developers to incorporate mixed-use designs in their projects.
- The city can also develop pilot projects to test the feasibility of mixed-use areas.

Scenario 2:

- The city government can engage with stakeholders to identify areas that are suitable for mixed-use development.
- The city can also provide incentives to developers who incorporate mixed-use designs in their projects.
- The city can also conduct surveys to understand the preferences of residents for mixed-use areas.

Scenario 3:

- It is important to ensure that mixed-use areas are well-connected to other parts of the city. This can be achieved by developing a comprehensive transportation network.
- The city can also develop pedestrian and bicycle-friendly infrastructure to encourage people to use these modes of transportation.
- The city can also conduct surveys to understand the preferences of residents for transportation options.

Scenario 4 (ADVANCED):

- It is important to ensure that mixed-use areas are integrated with other city services, such as schools, healthcare facilities, and recreation centers.
- The city can also develop partnerships with other city agencies to ensure that mixed-use areas are well-supported.
- The city can also conduct surveys to understand the preferences of residents for other city services.

Feature | Definition | Scenario 1 (BASE) | Scenario 2 | Scenario 3 | Scenario 4 (ADVANCED) | Self-assessment of the city (for Pan-City and city of interest) | Basis for assessment (qualitative and/or quantitative indicator) (optional) | Projects of intervention that would move the city from BAS to ADV | Basis for decision that would move the city from ADV to PAN | Scenarios for intervention that would move the city from ADV to PAN
--- | --- | --- | --- | --- | --- | --- | --- | --- | --- | ---
| Scenario 1 (BASE) | | | | | | | | | | |
| **Feature 1:** Land use | The city has different land use patterns and they are not well connected to each other. | The city has mostly separated uses and areas are not well connected to each other. | The city is developing a comprehensive transportation network to connect different areas. | The city is developing partnerships with other city agencies to ensure that mixed-use areas are well-supported. | The city is conducting surveys to understand the preferences of residents for other city services. | | | | | |
| **Feature 2:** Connectivity and mobility | Every part of the city is connected to other parts of the city through a variety of transportation options. | The city is developing a comprehensive transportation network to connect different areas. | The city is developing partnerships with other city agencies to ensure that mixed-use areas are well-supported. | The city is conducting surveys to understand the preferences of residents for other city services. | The city is conducting surveys to understand the preferences of residents for other city services. | | | | | |
| **Feature 3:** Education | There are some educational facilities in the city, but they are not easily accessible to people living in residential neighborhoods. | The city is developing a comprehensive transportation network to connect different areas. | The city is developing partnerships with other city agencies to ensure that mixed-use areas are well-supported. | The city is conducting surveys to understand the preferences of residents for other city services. | The city is conducting surveys to understand the preferences of residents for other city services. | | | | | |
| **Feature 4:** Healthcare | There are some healthcare facilities in the city, but they are not easily accessible to people living in residential neighborhoods. | The city is developing a comprehensive transportation network to connect different areas. | The city is developing partnerships with other city agencies to ensure that mixed-use areas are well-supported. | The city is conducting surveys to understand the preferences of residents for other city services. | The city is conducting surveys to understand the preferences of residents for other city services. | | | | | |
| **Feature 5:** Employment | There are some job opportunities in the city, but they are not easily accessible to people living in residential neighborhoods. | The city is developing a comprehensive transportation network to connect different areas. | The city is developing partnerships with other city agencies to ensure that mixed-use areas are well-supported. | The city is conducting surveys to understand the preferences of residents for other city services. | The city is conducting surveys to understand the preferences of residents for other city services. | | | | | |
| **Feature 6:** Public facilities | There are some public facilities in the city, but they are not easily accessible to people living in residential neighborhoods. | The city is developing a comprehensive transportation network to connect different areas. | The city is developing partnerships with other city agencies to ensure that mixed-use areas are well-supported. | The city is conducting surveys to understand the preferences of residents for other city services. | The city is conducting surveys to understand the preferences of residents for other city services. | | | | | |
| **Feature 7:** Economic and social indicators | The city is developing indicators to measure the success of its development initiatives. | The city is developing indicators to measure the success of its development initiatives. | The city is developing indicators to measure the success of its development initiatives. | The city is developing indicators to measure the success of its development initiatives. | The city is developing indicators to measure the success of its development initiatives. | | | | | |
| **Feature 8:** Governance | The city government is developing policies to ensure that the development initiatives are successful. | The city government is developing policies to ensure that the development initiatives are successful. | The city government is developing policies to ensure that the development initiatives are successful. | The city government is developing policies to ensure that the development initiatives are successful. | The city government is developing policies to ensure that the development initiatives are successful. | | | | | |
Compact

A Smart City has at least 10% of its electricity generated from renewable sources.

Scenario 2

Buildings have high energy efficiency levels and buildings are well connected to the grid. The city has made plans to provide high-speed internet connectivity throughout the city.

Public open spaces

The city has made plans to provide high-speed internet connectivity throughout the city.

Housing and inclusion

The city has made plans to provide high-speed internet connectivity throughout the city.

Transport

The city has made plans to provide high-speed internet connectivity throughout the city.

Environment

The city has made plans to provide high-speed internet connectivity throughout the city.

Public open spaces

The city has made plans to provide high-speed internet connectivity throughout the city.

Housing and inclusion

The city has made plans to provide high-speed internet connectivity throughout the city.

Transport

The city has made plans to provide high-speed internet connectivity throughout the city.

Environment

The city has made plans to provide high-speed internet connectivity throughout the city.

Public open spaces

The city has made plans to provide high-speed internet connectivity throughout the city.

Housing and inclusion

The city has made plans to provide high-speed internet connectivity throughout the city.

Transport

The city has made plans to provide high-speed internet connectivity throughout the city.

Environment

The city has made plans to provide high-speed internet connectivity throughout the city.

Public open spaces

The city has made plans to provide high-speed internet connectivity throughout the city.

Housing and inclusion

The city has made plans to provide high-speed internet connectivity throughout the city.

Transport

The city has made plans to provide high-speed internet connectivity throughout the city.

Environment

The city has made plans to provide high-speed internet connectivity throughout the city.

Public open spaces

The city has made plans to provide high-speed internet connectivity throughout the city.
**Water supply**

- A Smart City has a reliable, 24/7 supply of water that meets national and global health standards.
- There are no clear targets to achieve water availability. There are no clear targets to achieve water availability.
- Water loss is less than 30%.

**Waste water**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high. All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)
- Water harvesting is not prevalent. Flooding often occurs.
- Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Sanitation**

- Many parts of the city do not have access to sanitation facilities. Sanitation facilities are available to 90% of the city's population.
- Scenario 1: 100% waste collected is recycled
- Scenario 2: 100% D2D waste collection and 50% recycling of waste water and sewage.
- The city has programs and projects to monitor air quality that are essential for the city's public health and that are core to the city's economic development.
- The city has meters for all its water supply. It includes the required elements of green building projects so that their design and spatialising the data to ascertain reasons for water loss is less than 30%.

**Air quality**

- The city has no programs or projects to monitor air quality and that are core to the city's economic development.
- The city has no programs or projects to monitor air quality and that are core to the city's economic development.
- The city has no programs or projects to monitor air quality and that are core to the city's economic development.

**Energy efficiency**

- No focused initiative or regulatory policy for air quality monitoring and air quality monitoring cover the entire city.
- The city has 24x7 water supply - GIS mapping.

---

**Water management**

- Scenario 1: Zero discharge of untreated waste water
- Scenario 2: 5 police chowkis & 6 patrolling vehicles added

**Waste water management**

- Waste water management is considered.
- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Sanitation**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high.
- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Water supply**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high.
- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Waste water**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Sanitation**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Water supply**

- The city has no programs or controls or incentive mechanisms to monitor. - The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Energy efficiency**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Sanitation**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Water supply**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Waste water**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Sanitation**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Water supply**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Waste water**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)

**Sanitation**

- The city has no programs or controls or incentive mechanisms to monitor. Water wasteage is very high; All the existing old and new public buildings employ energy efficiency principles in development and operation and apply for energy rating by national and international safety standards. (Guideline 2.4.8)
Most waste water is collected and treated before disposal. However the treated water does not meet standards and is not recycled for secondary uses. High. Some, but not much, rainwater harvesting exists. 

In some parts of the city, there is a mixture of land uses that would allow someone to live, work, and shop in close proximity. However, in most areas, there are only small retail stores with basic supplies near housing. Most residents must drive or use public transportation to access a shop for food and basic daily needs. Land use rules support segregating housing, retail, and office uses, but exceptions are made when requested.

The city has meters for all its water supply but lacks mechanisms to monitor. Water wasteage is very high. Some, but not much, rainwater harvesting exists. 

The city has medium levels of public safety - some more vulnerable groups feel insecure during some points of the day and in some parts of the city.
**ANNEXURE 3.1: CITY PROFILE**

**LOCATION & CONNECTIVITY**
- Latitude: 13°58' N & Longitude: 75°34' E
- Strategically located at foot hills of Western Ghats with good road & rail connectivity.
- Air connectivity – Bangalore (315 km) & Mangalore (195 km)

**SALIENT FEATURES**
- Ideal Climate for human habitation - Av mean temp: 17.5°C-31.0°C; 571 m above MSL
- Rich in Biodiversity & Natural Resources
- Ample Water resources – River Tunga flows across the city
- Eco Tourism Hub – located in vicinity of various eco tourism spots
- Educational Hub
- Good access to basic services
- Major Economy - Agriculture, Agro based industries, Auto mobile parts

**PROPOSED LAND USE MAP**

**RESIDENTIAL & COMMERCIAL SPREAD**
Predominantly Residential Character – 52.81%
Commercial Concentration in CBD - 4.55%

**BLUE & GREEN SPREAD**
- Green Cover – 11.23% & Blue Cover – 7%
- Total Live lakes in city – 89 nos.
ANNEXURE 3.2: TOURISM POTENTIAL OF SHIMOGA

Nestled in the UNESCO World Heritage Site “WESTERN GHATS” has high potential for Eco tourism.

TOURISM DESTINATIONS IN 30 KMS RADIUS

- Mandagadde
- Gudavi
- Jog Falls
- Honnemardu
- Agumbe
- Keladi
- Kayale Durga Fort
- Onaki Abbi
- Kuppali Kuveppu Museum
- Bhadra Dam
- Sakrebeylu Elephant Camp &...
- Gudvi Bird Sanctuary
- Chandraguttu temple
- Keladi / Ikkeri Temple
- Jogfall
- Shivappa Nayaka Palace
- Thavarekoppa Lion safari

Heritage Conservation

1. Shivappa Nayaka Palace
2. Thavarekoppa Lion/Tiger Safari
3. To Sakrebeylu - Elephant camp
4. Raggi Gudda - Yakshaganna, Chowdamuni
5. River Front
6. Giddibidri Park
7. Gajanan Dam
8. Bhadra Dam
9. Mandagadde Bird sanctuary( 30 KMS)
10. Sacred Hearts Church
**ANNEXURE 3.3: AREA BASED DEVELOPMENT AREA PROFILE**

**KEY PLAN**

- Land Use Map
  - Clutters Roads
  - Disorganised utilities
  - Chaotic Bus Terminal

- Ward Map
  - 70 KM²
  - 18 KM²

- Tunga Riverfront
- Shivappa Nayaka Palace
- Gandhi Park

**TOTAL ABD AREA**
1500 acres (6.0 sq. km.)

**IMPACT POPULATION**
83,000 (23%)

**WARD NO**
3, 8, 9, 10, 11, 12, 17, 18, 19, 20, 26

**ABD CHARACTER**
- Mixed land use in CBD area located along the Riverfront
- Includes city level transport modes - bus terminal, railway station, bridges
- Lacks NMT infrastructure; poor dependency & coverage of PT system;
- Only six junctions are signalised; other roads are manually operated
- Lack of designated parking areas; 30% of the roads have free parking

**GREEN & BLUE COVER, HERITAGE**

- Total Green Cover: 15%; Total Blue Cover: 20%
- Other Recreational areas - 18 nos of ward level parks; Gandhi park, Nehru Stadium
- Heritage spots - Shivappa Nayaka Palace, Sandal wood factory along the Riverfront
- 8.5 km of Riverfront area which is free of encumbrance & encroachments

**WARD MAP**

- Irrigation Canal
- Sandalwood factory
- Tunga Riverfront
- Gandhi Park
- Shivappa Nayaka Palace

**TRAFFIC & TRANSPORTATION**

- Includes city level transport modes - bus terminal, railway station, bridges
- Lacks NMT infrastructure; poor dependency & coverage of PT system;
- Only six junctions are signalised; other roads are manually operated
- Lack of designated parking areas; 30% of the roads have free parking

**MIXED LAND USE PATTERN**

- Total no of slum: 10 nos; slum population: 7,877 (9%)
- Includes HIG & MIG housing in residential areas
- CBD area acts as major commercial and institutional centre of the city
ANNEXURE 3.4: CITIZEN ENGAGEMENT

Total City Population: 360,000 (100%  2015 projected population)
Awareness generated to over 60% of population
Media: over 1,20,000 responses (33.3%)
Handouts: 65,498 responses from 100,000 handouts (18.19%)
Painting competition: 2700 entries (0.75%)
Essay writing: 303 essays (0.08%); Quiz Competition - 60
Street Plays: 25 plays in slum areas (reached to 33% of slum dweller)
Public Banner/hoardings: 60 numbers across the city:
Ward Consultations: average of 1250 in each of 35 wards. 12% of City population

Citizens aspiration Indicator of Shivamogga

Citizens priorities Indicator for Area Development Proposal
ANNEXURE 3.6: AREA BASED DEVELOPMENT PROPOSAL

CASE STUDY: Seol Stream Restoration Project (Cheonggyecheon)

A. GREEN INITIATIVE

1. Green zone along the canal

2. Integrated bus terminal

3. MLCP

4. Smart poles

5. Smart bus shelters

6. Dedicated bi-cycle lane

7. Pedestrian pathway

8. No vehicle road

9. No vehicle road

B. PROPOSALS - 920 acres

C. INCLUSIVE DEVELOPMENT

- Compact dense planning
- Slum redevelopment

- Improvising road intersections
- Skywalk

- Enhancing green zones
- Solar panels generation

Lower canal section
ANNEXURE 3.7: AREA BASED DEVELOPMENT PROPOSAL

TOTAL AREA BASED PROPOSAL EXTENT- 1500 Acres
RIVER FRONT DEVELOPMENT - 275 Acres

A. ECO-TOURISM & RECREATION ZONES
- River front landscape
- Amphitheatre
- Cafe & restaurants
- Yoga & naturopathy centre
- Aquarium
- Cross section of the river

B. HERITAGE AND CULTURAL HUB:
- Heritage walkway
- Woodcraft centre

C. KNOWLEDGE & SKILL TRAINING HUB:
- Pedestrian bridge
- Floriculture & orchidarium centre
- Bio-diversity centre
PROPOSAL 1: INTEGRATED TRAFFIC & TRANSPORTATION SYSTEM (ITTS)

VEHICLE TRACKING
- Bus with GPS
- Backend system
- SIM

INTEGRATED TICKETING
- Hand held ticketing system
- Call Centre
- Backend system

SMART PARKING
- MLCP
- Handheld ticketing system
- Backend system
- AMC

VARIABLE MESSAGE SIGNS
- Back end system
- AMC
ANNEXURE 3.9: PAN CITY PROPOSAL

PROPOSAL -2: ICT BASED SOLID WASTE MANAGEMENT SYSTEM

SMART WASTE MANAGEMENT SYSTEM

- Bio metric
- Sweeper
- Garbage vehicle
- Call Centre
- AMC

PROPOSAL -3: INTELLIGENT LED STREET LIGHTING & SURVEILLANCE SYSTEM

STREET LIGHTING CONTROL SYSTEM

- Solar LED
- Battery
- Backend system
- Remote

CCTV CAMERA SURVEILLANCE SYSTEM

- Surveillance camera
- SIM card
- Backend system
- AMC

SUMMARY RECORD OF DISCUSSIONS OF THE 106TH MEETING OF THE ADVISORY COMMITTEE ON IRRIGATION, FLOOD CONTROL AND MULTI PURPOSE PROJECTS, HELD ON 27TH OCTOBER, 2010 FOR CONSIDERATION OF TECHNO-ECONOMIC VIABILITY OF PROJECT PROPOSALS.

Economic viability of Irrigation, Flood Control and Multi-Purpose Projects proposal was held on 27.10.2010 at 1500 Hrs. in the Conference Room of Central Water Commission, Sewa Bhawan, R.K. Puram, New Delhi under the Chairmanship of Shri U.N. Panjjar, Secretary (WR). List of participants is enclosed at Annexure-I.

At the outset, Chairman welcomed the Members of the Committee and other Officers present in the meeting. Thereafter, the Chairman requested the Member-Secretary to take up the agenda for discussion. Proceedings of the meeting followed as under:

I) CONFIRMATION OF THE MINUTES OF THE 106TH MEETING:

The Summary Record of Discussions of the 106th Advisory Committee meeting was circulated vide Letter No.16/27/2010-PA (N)/1939-84, dated 4.10.2010. Member-Secretary informed the Committee that no comments on the same have since been received. The Committee confirmed the Summary Record of discussions of the 106th Advisory Committee meeting.

II) PROJECT PROPOSALS CONSIDERED BY THE ADVISORY COMMITTEE:

1.0 INDIRA SAGAR (POLAVARAM) PROJECT, A.P. (REVISED-MAJOR)

CE (PAO), CWC briefly introduced the project. The Indira Sagar (Polavaram) Project envisages construction of a dam across the river Godavari at a village near Polavaram in West Godavari district of Andhra Pradesh. The project is contemplated as a Multipurpose Project conferring annual irrigation to an extent of 4.36 lakh ha. In upland areas of four districts of Andhra Pradesh namely, East Godavari, Vishakhapatnam, West Godavari and Krishna; water supply to Vishakhapatnam Steel Plant and industries in and around Vishakhapatnam besides domestic water supply to enroute towns and villages; diversion of 80 TMC of water to Krishna basin and generation of hydropower with installed capacity of 960 MW.

The said proposal was earlier considered by the advisory committee in its 95th meeting held on 20.01.2009 and was accepted for Rs.10151.04 crore at 2005-06 Price Level. Planning commission accorded investment clearance to the proposal on 25.02.2009 for Rs. 10151.04 crore. The State Govt. has now submitted the Revised Cost Estimate at 2010-11 price level without change in scope. Revision was necessary due to...
2931.55 cr. is required to create balance potential of only 18%. The project informed that 84% of the potential created as indicated in the DPR is the area irrigation facilities have been created due to construction of main/branch canals whole of this area cannot be irrigated unless minor/water courses are completed. The area under irrigation up to end of 2010 is 4.54 lakh ha which is about 50% of the proposed annual irrigation.

Secretary (WR) suggested that the cost of pressure pipes etc., be kept as sub-head V-water courses. He further suggested that the cost of the sprinkler system to be installed by the farmers should also be taken into consideration while working out B.C. ratio of the project proposal.

He further enquired about the electricity charges considered for lifting. The project authorities informed that Rs.1.20 per unit was considered for new charges after deducting subsidy by the Government of Rajasthan. Secretary suggested that B.C. ratio be worked out considering the market rate for electricity levied for lift system, excluding the subsidy by the Government of Rajasthan.

The project authorities submitted modified abstract of the cost estimate and computations for B.C. ratio, taking into consideration above observations of Secretary (WR). The B.C. ratio now worked out is 1.59. Since, this requires to be examined after brief discussions, the committee deferred this proposal for consideration in the next meeting.

10. **FLOOD PROTECTION WORKS ALONG BANKS OF RIVER TU**

**SHIMOGA TOWN FROM CH: 11.754 KM TO CH: 14.410 KM AND VILLAGE FROM CH: 6.006 KM TO CH: 7.036 KM IN SHIMOGA DISTRICT**, KARNATAKA STATE:

CE (PAO), CWC briefly introduced the project. The proposal is for construction of counterfort retaining wall in River Tunga on right bank at Mattur and Shprintikere and on left bank at Shimoga Town for a length of 2.646 km area of 11 ha of residential and commercial land in Mattur and Shimoga.
The Cost Estimate of the project has been finalized for Rs. 55.18 crore (at 2010-11 Price Level) and BC ratio is 1.50. State Finance Concurrence has been submitted by the Project Authorities (Annexure-V).

After brief discussions, the committee accepted the proposal.

11. FLOOD PROTECTION WORKS FOR HEMAVATHI RIVER (CH: km 29.50 – km 31.50) AT HOLENRASIPUR IN HASSAN DISTRICT OF KARNATAKA STATE:

CE (PAO), CWC briefly introduced the project. The proposal envisages construction of a counter fort retaining walls in river Hemavathi on right bank at Holenarsipur town for a length of 2.0 km, in Hassan district of Karnataka State. The proposed works would minimize inundation of town of Holenarsipur and would result in saving of annual damage to the infrastructures to the extent of Rs.6.991 crore and would provide protection to the life and properties of the people of Holenarsipur town. The proposed scheme would benefit an area of 7 ha residential and commercial land and population of about 20,000.

The Cost Estimate of the project has been finalized for Rs. 25.48 crore (at 2010-11 Price Level) and BC ratio is 1.71. State Finance Concurrence has been submitted by the Project Authorities (Annexure-VI).

After brief discussions, the committee accepted the proposal.

11.1 FLOOD PROTECTION WORKS ALONG LEFT AND RIGHT BANK OF RIVER GORAKHPUR & SANT KABIR NAGAR.

CE (PAO), CWC mentioned that the Scheme was earlier discussed in the 106TH TAC Meeting of MoWR held on 16.09.2010 and was deferred for want of State Finance Concurrence for the finalized cost of Rs. 52.29 Crore (PL 2009-10).

Now, the project authorities have submitted State Finance Concurrence (SFC) for the finalized cost of the project from Govt. of Uttar Pradesh (Annexure-VII).

After brief discussions, the committee accepted the proposal.

The meeting ended with vote of thanks to the Chair.
LIST OF PARTICIPANTS

Members of the Committee:

S/ Shri
1. U. N. Panjjar, Secretary (WR), Ministry of Water Resources In the Chair

SHIVAMOGGA CITY CORPORATION, SHIVAMOGGA

NO: SCC/EE/ELE/02/2015-16

Dated: 08th May 2015.

EXPRESSION OF INTEREST (EOI) FOR STREET LIGHT ENERGY EFFICIENCY PROGRAMME
(Through e-procurement portal only)

As part of Karnataka energy efficiency and energy conservation policy 2015-2019 programme, Shivamogga City Corporation (SCC) seeks “Expression of Interest” from interested agencies on behalf of the Commissioner, SCC to conduct Investment Grade Energy Audit study and sign Energy Performance Contract for implementation of energy saving measures in Shivamogga City Corporation Street Lighting. SCC intends to replace nearly 18000 HPSV, MH, CFL, FTL streetlight fittings by LEDs of suitable ratings to maintain/improve the illumination level as per NLC SP 72:2010. The agency may also use energy saver devices along with above. The bidders are required to download and submit their EOI electronically through the GOK’s, e-procurement website: http://www.eproc.kar.gov.in for pre-qualifying from 12th May 2015. Pre-bid meeting, if required will be held at office of the Commissioner, Shivamogga City Corporation, Shivamogga on 26-5-2015.

Deadline for Submission:
Interested bidders are requested to download the same and submit latest by 17.00 hours on 15-06-2015.

Note: This invitation of EOI is neither an agreement nor an offer/invitation for award of work. The purpose of this EOI is to provide interested parties with information and seek their inputs for the project.

Subject: Smart City Mission- Development of Shivamogga as a smart City under smart city Mission Role of Irrigation Dept. under the Mission- 15C.

1. In view of the above, the irrigation department has decided to carry out various activities related to the smart city mission. The following are the activities planned:

a) Preparation of a report on the current status of the irrigation department.

b) Implementation of various projects related to the smart city mission.

2. The irrigation department has already started working on these activities and is making progress.

Sincerely,

[Signature]

[Position]

[Date]
Issue of no objection certificate (NOC) to implement canal roof top and buffer solar project on Upper Tunga canal for a stretch of 12km which is passing through Shivamogga City.

2. SCC Smart city aee - 4 cr : 2016-17 in: 27.01.2016.
4. SCC Smart city aee - 4 cr : 2016-17 in: 30.03.2016.

1. Vardhaman U.Tanga Project Development Corporation Limited, Kalaburagi is implementing a project for roof top solar projects on Upper Tunga canal. The area of the project is 35 acres. It is proposed to construct a solar power plant of 10 MW capacity on the canal. The project includes the construction of steel girders for the solar panels. The project is expected to be completed by December 2017.
2. The project is being executed under the banner of SCC Smart City Project. The project is expected to provide clean and renewable energy to the local community. The project is expected to generate around 200 million units of electricity per year.
3. The project is being implemented with the support of various agencies, including the Karnataka State Electricity Board and the Karnataka Renewable Energy Development Authority.
4. The project is expected to provide employment opportunities to around 1000 people during the construction phase and 500 people during the operation phase.

M/s CJN Power Pvt. Ltd., M/s Roop Ganga Pvt. Ltd., & M/s Trimurthi Power Ltd., are the contractors selected for the project.
No. KSDL/MD/2016-17/ 52

June 16, 2016

The Commissioner
Shivamogga City Corporation
Shivamogga

Madam,

Sub: Request for acceptance to develop and utilize the premises of KSDL for promotion of Shivamogga Economy.
Ref: Your letter No.SCC/PA/CR-05/2016-17 Dt.15.06.2016

With reference to your request letter to provide KS&DL premises for setting up of production, exhibition and training center for food and beverages on PPP basis, as a part of the Smart City Project, we hereby give our consent to be part of this initiative of developing Shivamogga as a Smart City. As the project is only in the stage of conceptualization, the norms and conditions to be framed should be decided in consultation with KSDL so that the interests of the Company is not jeopardized at any point of time.

Thanking you,

Yours sincerely,

Dear Sir/ Madame,

To Whom It May Concern

**RE: Investment for Shimoja Riverfront Development.**

We are interested in understanding further how we can take part in the riverfront development in Shivamogga similar to the one along River Thames in London. Also, we are interested in the Airport in Shivamogga.

We have international investors with capacity of Rs. 50 crores who are looking to venture in a PPP (Public Private Partnership) for such projects in India.

We would also like to request more information to know if it is possible to work on a partnership where 4 to 5 acres of land in Shivamogga can be allotted for this purpose.

If all goes well, our intentions are to employ circa 100 people in Shivamogga in the next couple of years.

If you need any more information, please do not hesitate to contact me.

Thank you in advance for your kind assistance.

Kind Regards,

J. Bharvada

To,
The Commissioner
Shimoga City Corporation
Shimoga.

Respected Sir,

Sub: Expression of Interest under smart city scheme of Govt. Of India to build Solar Project on Upper Tunga canal Roof Top & Canal Bank for a stretch of 3.5Kms which is passing through Shimoga City.

***

With reference to the above scheme I would like to Express our interest to build solar project on Upper Tunga Irrigation Canal Roof Top & Canal Bank which is passing through Shimoga City which comes around for a total stretch of 1.4Km and a span of 75mtrs as per the information provided by Irrigation Department, out of which we need to be allocated a stretch of 3.5Kms at a span of 75mtr to implement 10MWp Solar PV.

Since the Shimoga City has been selected under smart city scheme of Govt. Of India & being born and brought up in Shimogga, working as a developer in the power sector since 1998, I am very keen to participate in Shimoga City development. Now I feel it is our prerogative and obligation to take part in the process of providing solution to produce green power, which is one of the key factor of basic infrastructure required to keep the city live and vibrant. Under Ministry of New And Renewable Energy (MNRE) Scheme GOI, Since 1998 I have been working successfully as an Independent Power Producer (IPP), I would like to give brief note on the projects I have been allotted and have been implemented successfully.

1. Trishul Power Pvt., Ltd., in the name of this company in 1999, I got the allotment of 3MW Mini Hydel Scheme on Hemavati River at Hemagiri Anicut near Chamrajpet, Hassan Dist., I have implemented this project successfully.
2. In the name of the same Trishul Power Pvt., Ltd., in 2000 I got the allotment of 3MW Mini Hydel Scheme on Hemavati River at Mandagere Anicut, upper reaches of Hemagiri Anicut which is also implemented successfully.
3. Bhadrakali Power Pvt., Ltd., in the name of this company in 2001, I got the allotment of 3MW Mini Hydel Scheme on Bhrada River at Gondi Anicut near Bhadravathi, Shimoga Dist., which is been implemented.
4. Trishurythi Power Pvt., Ltd., in the name of this company in 2002 I got the allotment of 24X2= 48MW Small Hydro Project on Addhole River which is the Tributary of Kumaradhura River near Kukke Subramanya at Bisle Village, Sakkleshpur Tal.; Hassan Dist. Because of MOEF hurdles created by Dr. Madhavan Gagadi Committee Report, we were unable to obtain Forest Clearance in time. Now recently Dr. Kasturi Rangan Committee Report on the Western Ghats has clearly indicated to allow Hydro Electric Projects in Eco Sensitive Area also because of non polluting nature of green energy, now preparations are underway to obtain the forest clearance to implement this project worth Rs. 350.00 crores.
5. Govt. of Karnataka Energy Department has formed a new solar policy 2014 to 2021. Under this scheme Hon’ble Govt. Provided an opportunity to the Land owning formers to set up 1 MW to 3 MW Solar Projects in their own land. Under this scheme we have succeeded in obtaining 2X2=4 MW Solar Project and we have signed PPA with BESCOM at Rs 8.40/- Per unit. Now we are under the process of implementing this project.

Being well aware of implementing Green Energy Power Projects for the past 18 years, I have the right set of Agencies who are working in Implementation of my project.

Gujarat State is a pioneer in building canal Roof Top Solar Project on the globe & the agencies who have worked as EPC contractors are ready to serve under me if the project is allotted to my company as we have the right set of Agencies who are ready to work with us.

Karnataka Electricity Regulatory Commission’s (KERC) order on Tariff determination dated 10.10.2013 has fixed Rs.9.56/-per unit /kwhr for Roof top & Small Solar Power Plants. Under this category we are interested to implement this project once the city limit stretch of 3.5km canal area land which is under the control of Irrigation Department is provided to us.
In Gujarat while implementing Canal Roof Top project of 11 KM it has costed them Rs. 11.5 Cr./MW, but now price have slashed because of technology revolution, we have given our Techno Economical Viable Proposal which is costing around Rs. 10.5 Cr./MW Totally project cost may come around Rs.108.00 cr. Which we are capable to arrange on our own, if the above mentioned KERC Tariff is provided to us. We don't need any type of financial support from your side. The copy of feasible report is submitted for your kind perusal to issue allotment letter in favour of our TRIMURTHI Power Pvt. Ltd., company which is formed to implement our Solar Projects.

I look for speedy and positive reply from your side.

Thanking You with regards,

Yours faithfully

Karatka Electricity Regulatory Commission’s (KERC) order on Tariff determination dated 10.10.2013 has fixed Rs.9.56/-per unit /kwhr for Rooftop & Small Solar Power Plants. Under this category we are interested to implement this project once the city limit stretch of 3.5km canal area land which is under the control of Irrigation Department is provided to us. In Gujarat while implementing Canal Roof Top project of 11 KM it has costed them Rs. 11.5 Cr. /MW, but now price have slashed because of technology revolution, we have given our Techno Economical Viable Proposal which is costing around Rs. 10.5 Cr./MW Totally project cost may come around Rs.108.00 cr.

Which we are capable to arrange on our own, If the above mentioned KERC Tariff is provided to us. We don’t need any type of financial support from your side. The copy of feasible report is submitted for your kind perusal to issue allotment letter in favour of our RoogGanga Power Pvt., Ltd., company which is formed to implement our Solar Projects.

I look for speedy and positive reply from your side.

Thanking You with regards.

Yours faithfully

To
The Commissioner
Shimoga City Corporation
Shimoga

Respected Sir,

Sub: Expression of Interest under smart city scheme of Govt. Of India to build Solar Project on Upper Tunga Canal Roof Top & Canal Bank for a stretch of 3.5Kms which is passing through Shimoga City.

***

With reference to the above scheme I would like to Express our interest to build solar project on Upper Tunga Irrigation Canal Roof Top & Canal Bank which is passing through Shimoga City which comes around for a total stretch of 14 Km and a span of 75mtr as per the Information provided by Irrigation Department, out of which we need to be allocated a stretch of 3.5Kms at a span of 75mtr. to Implement 10MWp Solar PV.

Since the Shimoga City has been selected under smart city scheme of Govt. Of India & being born and brought up at Shivamogga, I am very keen to participate in Shimoga. Now I feel it is our prerogative and obligation to take part in the process of providing solution to produce green power, which is one of the key factor of basic infrastructure required to keep Indian city live and vibrant.

Govt. Of Karnataka Energy Department has formed a new solar policy 2014 to 2021. Under this scheme Hon'ble Govt. Provided an opportunity to the Land owning formers to set up 1 MW to 3 MW Solar Projects in their own land. Under this scheme we have succeeded in obtaining 2 MW Solar Project and we have signed PPA with BESCOM at Rs 8.40/- Per unit. Now we are under the process of implementing this project.

Gujarat State is pioneer in building canal Roof Top Solar Project on the globe & the agencies who have worked as EPC contractors are ready to serve under me if the project is allotted to my company as we have the right set of Agendas who are ready to work with us.

Karnataka Electricity Regulatory Commission's (KERC) order on Tariff determination dated 10.10.2013 has fixed Rs.9.56/-per unit /kwhr for Roof top & Small Solar Power Plants. Under this category we are interested to implement this project once the city limit stretch of 3.5km canal area land which is under the control of Irrigation Department is provided to us. In Gujarat while implementing Canal Roof Top project of 31 KM it has cost them Rs. 11.5 Cr./MW, but now price have slashed because of technology revolution, we have given our Techno Economical Viable Proposal which is costing around Rs. 10.5 Cr./MW Totally project cost may come around Rs.108.00 cr. Which we are capable to arrange on our own, If the above mentioned KERC Tariff is provided to us. We don't need any type of financial support from your side. The copy of feasible report is submitted for your kind perusal to issue allotment letter in favour of our CIN Power Pvt., Ltd., company which is formed to implement our Solar Projects.

Sub: - Land Proposal for Cultural developments along the Tunga river

Dear Sir,

We have this information that your good office intends to promote and develop land along the Tunga river to develop them as places for Spiritual and Cultural activities.

We are quite interested in this land proposal of granting to charitable trusts and societies to develop such land for the said purpose.

ISKCON is quite well known all over the world to uphold and spread the Traditional Cultural Heritage of Vedic India. We take this opportunity to please update us on the land proposals as and when your office takes up the matter.

Thanking you

Yours in the service of Lord and Mankind

RE: Investment for Shimoga Smart City.

We are a UK and Bangalore based IT Services Company providing world leading innovative solutions who are looking to invest in Shimamogga in the near future.

We are interested in opening offices in Shimamogga to service customers locally and internationally in the Managed Technology Infrastructure space. We are also interested in building a Tier 3 Datacentre in Shimamogga for these customers.

If all goes well, our intentions are to employ circa 150 people in Shimamogga in the next couple of years.

Finally, we are also interested in some of the SMART City projects where we have great expertise to provide resilient solutions.

If you need any more information then please do not hesitate to contact me.

Thank you in advance for your kind assistance.

Dear Sir/Madam,

Reader.Solutions Inc is based out in Dublin California, US focused on interactive streaming, multi lingual chat and audio marking.

Part of our strategy is to blend with the various languages and thereby, spread globally. In this context we would like to explore opportunities in India and hence looking for centers that would help achieve this goal. One of our local partners recommended setting up an office in Shivamogga.

Our intent is to explore the opportunity and if it aligns to our overall planning efforts we would be hiring about 70 in the next couple of years.

Please let me know if you would need further information. Thank you in advance for your kind assistance.

Dear Sir/ Madame,

TheTurtleWins Inc is based out in Santa Clara California, US. We are primarily health and wellness company focused on nutrition, portion controlled well balanced food and right fitness.

As part of our endeavor, we want to spread this message and bring our offerings to India.

We are looking for strategic and upcoming centers and quite interested in setting up our office, nutrition center in Shivamogga. Our initial thoughts are to hire at least 20 to 40 people to cater to our solutions. If everything goes according to our plans, we should slowly expand to about 100 in the next couple of years.

If you need any more information then please do not hesitate to contact me. Thank you in advance for your kind assistance.

Sincerely

Dear Sir,

As you are aware, Government of India is implementing the 'Swachh Bharat Mission' (SBM) with the goal of achieving a Clean India by 2nd October, 2019. The success of this to a large extent depends on creating awareness and influencing behavior change among citizens to further the goals and objectives of the Mission.

2. As this is a time bound mission, it is critical that such behavior change is being driven on all fronts in order for it to be fully successful. It is agreed that once the provisioning has been made and awareness created, driving behaviour change is also affected by punitive provisions for citizens indulging in wrong practices.

3. The state of Rajasthan has already notified a mechanism for levying penalty/carrying charges for littering in public places and not following correct practices in garbage disposal. A copy of the notification (English translation) is enclosed.

4. On similar lines, it is proposed that appropriate modifications be made to the relevant state municipal bye-laws, or other enabling provision, as the case may be, in order to enable the following:

   a) For Wards which have been declared Open Defecation Free (ODF) – ref. DO letter vide dated 15th March 2016 and 2nd March 2016 (copies enclosed):

      i. A spot fine/p penalty/cleaning charge be levied on citizens who practice defecation in open.

      ii. The municipal commissioner or any other officer authorized by the municipal commissioner is authorized to levy the above defined fine/p penalty/c cleaning charge and collect the same.

   b) For Wards which have been declared Litter Free – i.e. wards where there is 100% routine door to door collection and an appropriate number of public litter bins have been made available:

      i. A spot fine/p penalty/cleaning charge be levied on citizens who practice littering and/or dumping garbage in public space or who practice unsuitable garbage disposal practices.

      ii. The municipal commissioner or any other officer authorized by the municipal commissioner is authorized to levy the above defined fine/p penalty/c cleaning charge and collect the same.
5. Therefore, it is proposed that such provisions be enacted across all wards of all cities in your state latest by October 2018. It is recommended that the following steps may be taken within the given timelines:

i. Enabling provision in municipal bye-laws (as per para 4 above): By 15th April 2016.

ii. Ward by ward, in every city, provision of door to door collection of garbage and provisioning of adequate number of public garbage bins: At least one ward in each city by April 31st 2016, all wards in 10-15 cities by end of 2016 and all wards in all cities by 30th September 2018.

iii. Ward by ward, in every city, declaration of wards ODF: At least one ward in each city by April 31st 2016, all wards in 10-15 cities by end of 2016 and all wards in all cities by 30th September 2018.

iv. Roll-out of spot fines/penalty/charges as per para 4 above, in at least 1 ward in each city by April 31st 2016, all wards in 10-15 cities by end of 2016 and all wards in all cities by 30th September 2018.

6. We look forward to your support in provisioning the above enablers expeditiously, and appropriately roll it out in the cities of your respective states.

With regards,

Yours sincerely,

(Praveen Prakash)

No.: F.55(1)CE/OLB/15/6625 Date: 11.03.2015

Notification

By using the authority vested through Rajasthan Municipal Corporation Act, 2009, section 337, sub section (4), in order to regularize Solid Waste Management and Handling Work in Municipal Corporation/Council/Municipality Areas and in view of the Urban Solid Waste (Management & Handling) Rules, 2000 issued in public interest through Environment and Forest Ministry, Government of India on 25 Sep 2000, the State Government hereby forms the following byelaws for Solid Waste of Urban Bodies (Management & Handling), i.e.: -

1. Name in brief and beginning:
   (i) These byelaws shall be called Solid Waste of Urban Bodies (Management & Handling) Byelaws - 2015.
   (ii) These byelaws shall come in force 30 days after their publication in the Rajasthan gazette.

2. Applicability: - These byelaws shall be applicable equally within the limits of all the Municipal Corporation/Council/Municipality areas of the state.

3. Definitions:
   (i) "Anaerobic digestion" means a controlled process that involves microbial division of organic matter in the absence of oxygen.
   (ii) "Authority" means the approval granted by the board or the committee to the “operator of the concession”.
   (iii) "Bio Degradable Material" means a material that can be degraded by micro organisms.
   (iv) "Organic, methanization" means a process that uses enzyme dissolution of organic matter by microbial action to produce methane-rich bio gas.
   (v) "Collection" means picking up and removing solid waste from collection points and from some other place.
   (vi) "Making compost" means a controlled process that involves microbial degradation of organic matter.
   (vii) "Demolition and construction waste" means waste generated by construction material, macadam and rubble from construction, renovation, repairs and demolition operations.
   (viii) "Disposal" means final disposal of urban solid waste with the care necessary to protect ground water, surface water and environment air quality from pollution.
   (ix) "Format" means the formats annexed with these rules.
(x) "Producers of waste" means persons or establishments producing urban solid waste.

(xi) "Land selection" means disposal of residual solid waste while taking care to protect ground water and surface water from pollution and the dust and dirt in the air, stench, fire hazard, bird hazard, pests/rodents, green house gas emissions, slope instability and erosion.

(xii) "Leachate" means a liquid that has seeped through solid waste or other medium and which has extracted soluble or suspended matter from it.

(xiii) "Lysimeter" means a device which is used to measure the movement of water in or through the medium of soil layer or which is used to collect the leached water for qualitative analyses.

(xiv) "Municipal Corporation Authority" means the urban body, where urban solid waste management and handling is handed over to one such agency.

(xv) "Urban solid waste" includes solid or semi-solid commercial and residential waste generated in urban/notified areas excluding industrial hazardous waste but including treated biomedical waste.

(xvi) "Operator of concessions" means a person who owns or operates the concession for collection, sorting, storage, transportation, processing and disposal of urban solid waste and it also includes any other agency appointed by the municipal corporation authority for management and handling of urban solid waste in their respective areas.

(xvii) "Pellet forming" means a process used to make pellets, which will be small cubes or cylindrical pieces from solid waste and will also include fuel pellets which is also specified as fuel obtained from garbage.

(xviii) "Processing" means a process whereby waste material is turned into new or recycled products.

(xix) "Recycling" means a process that turns sorted material into compost in order to produce new products that may or may not be similar to the original product.

(xx) "Schedule" means the schedule annexed with these rules.

(xxi) "Sorting" means separating organic, inorganic, recyclable and hazardous wastes into categories.

(xxii) "State board or Committee" means, as applicable, the State Pollution Control Board of a state or the Pollution Control Committee of a Union Territory.

(xxiii) "Storage" means binning urban solid waste temporarily in such a way as to prevent the garbage from spilling, attracting disease carriers and giving off bad smell.

(xxiv) "Transportation" means transporting urban solid waste from one place to another in specially designed transportation system so that stench, garbage spilling and disease carrier access can be prevented.
(xxvi) "Vadose water" means the water situated between top soil and ground water level, i.e. in the unsaturated area.

(xxvii) "Vermicompost" is the process of bio degradation of waste into fertilizer using earthworms.

4. Separation of urban solid waste: -

(i) It will be compulsory for all the citizens to store the urban solid waste generated from their place separately into wet and dry garbage placed in suitable bins with lids, and they will have to ensure its disposal by paying the monthly charges for the door to door collection facility provided at fixed times once a day so that the dirt and garbage does not spill on the public roads after the municipal corporation has cleaned them, otherwise anti-littering carrying charges shall be levied. A repetition shall attract a case in the court as per the rules.

(ii) The urban body will encourage the citizens from time to time. For this purpose, the municipal corporation shall be authorized to teach and encourage the local sanitation welfare associations, representatives of non government organizations, hygiene contractors of the municipal corporation and citizens to separate and store the garbage and to transport it properly.

5. Storage of urban solid waste: - All the urban bodies of the state shall establish and maintain solid waste storage facilities at their own level or through authorized regional contractors in such a way that it doesn’t create unhealthy/unhygienic atmosphere around them. The following criteria shall be adhered to while establishing and maintaining the storage facilities: -

(i) The storage facilities shall be created and established keeping in mind the amount of waste generated and the population density in the specified area, but there shall be a distance of minimum 500 meters between two storage facilities and there shall be not more than 05 storage facilities in a radius of 01 kilometer. The storage facility shall be in such a place with lidded mobile container where users can reach easily.

(ii) The storage facility provided by the municipal corporation/council/municipality or any other agency shall be designed in such a way that the collected garbage is not open to the atmosphere, is aesthetically acceptable to the users and should encourage them to place the garbage only inside the container.

(iii) In order to encourage separation at garbage bin points determined by municipal corporation/council/municipality, containers of different colors may also be placed as follows -

(a) Green - for bio degradable waste.

(b) White - for recyclable waste.

(c) Black / Yellow / Blue - for other general waste.
Carrier vehicles and compactors of easy operable designed shall be used for handling, removal and transportation of garbage / waste from these containers.

(iv) It shall be the responsibility of all the cooperative societies, associations and residential and commercial establishments to place containers of their own, with design approved by the urban body, at suitable places of necessary density, so that the daily garbage collected there can be stored properly. They can make arrangement for contracting the vehicles at user charges with the urban body to empty the bins timely.

(v) It shall be the responsibility of all the citizens to sell the recyclable waste produced in their areas to the rag pickers authorized by the urban body for working in their areas and not to throw them on the public roads or the garbage bins/containers of the urban body under any circumstances.

(vi) Action will be taken by the municipal corporations/councils/municipalities of the state or by some other system (on the basis of guidelines of BOT/VGF/Swachh Bharat Mission) and all the institutions shall have to adopt it by paying the charges determined by the urban body, otherwise carrying charges shall be levied on the spot from those found spreading such solid waste, or case can be brought against them.

(vii) The waste from butcheries, meat and fish markets, fruit and vegetables is of a bio degradable nature. This shall be managed in such a way that it can be utilized and that it does not spread any infectious diseases. To ensure this, the traders themselves will have to make their own arrangement and ensure proper disposal, or the urban bodies will have to ensure adherence by making door to door arrangement for collection, transportation and disposal of such waste, failing which, carrying charges shall be levied on the spot for spreading such waste, or case can be brought against them in court.

(viii) Bio medical waste and industrial waste shall not be mixed with urban solid waste and the collection of such waste shall be made as per the rules specified separately for this purpose. Common Bio Medical Waste Treatment Facility (CBWTF) is/will be implemented in various bodies for disposal of bio medical waste as per rules. Disposal of such hazardous waste will have to be ensured at the Common Bio Medical Waste Treatment Facility (CBWTF) plant at the prescribed charges.

(ix) The waste collected from residential and other areas will be carried to the determined community garbage dump/closed containers by tricycle rickshaw and taken to the processing plant by auto tipper vehicles.

(x) Waste/rubble generated by horticulture and construction/demolition activity shall be collected separately and be disposed of as per the appropriate standards. The urban body shall earmark one day in a week for this purpose and the horticulture waste must be compulsorily placed in the nearby determined garbage dump by noon of that day, so that it can be transported on time. The residual waste of private construction/demolition must be transported to the determined marked spot under own management or by paying the prescribed charges to the contractor authorized by the urban body. Throwing/keeping
such private rubble in open spaces, roads or at public places shall be punishable under the act and rules.

(xii) The waste (garbage, dry leaves etc.) shall not be burned.

(xiii) Stray animals shall not be allowed to roam freely around waste dumps or at other places in the city and arrangement will have to be made for them at authorized area/place only.

(xiv) No one will collect or throw waste water, muddy water, night soil, dung, excreta etc. from his/her building, institution or commercial establishment in such a way that can pollute the atmosphere with its stench and may harm public health or may obstruct traffic, failure of which, carrying charges shall be levied on the spot for spreading such waste, and case can be brought against them in court.

(vi) If a person is found spreading pollution or filth in public parks etc. by throwing dead cattle or parts, it will be a punishable offense and carrying charges shall also be levied.

6. Responsibility of urban bodies

(i) The urban administration shall ensure arrangements for cleaning daily and all the year at all the public roads, places, colonies, slums, areas, markets and tourism places, parks of the urban body, cremation grounds etc. and the urban body shall be committed to carry the garbage collected from these places to the nearest garbage bin/container and transport it every day from there to the final disposal place in closed vehicles, and the urban body shall be authorized to utilize its own permanent hygiene workers and vehicles in colonies where there are no hygiene works and also to utilize private contractors for full or partial daily cleaning work, so that the urban body is able to keep each area clean and beautiful in public interest.

(ii) In order to manage the complete daily cleaning arrangement of the city, the urban body shall be free to establish a ward office (complaint center) in each ward, garbage bin/container at suitable places as required, public toilets/urinals, transfer stations to transport the community garbage bins to the landfill for final disposal, processing unit, etc.

The controlling of cleaning arrangement and solid waste management for the urban body shall be done under the prescribed provision, which shall be adopted by the concerned waste producer.

7. Collection of urban solid waste - Spreading urban solid waste or garbage in the urban body area shall be prohibited. If any person is found to be spreading garbage at public places, roads, private open spaces, parks, sources of water etc., the authorized officer of the urban body, who shall be at least at the level of an inspector, shall be capable of charging carrying charges from the offender as per the attached "Schedule - A" as determined by the urban body from time to time. For this purpose, the urban body shall:

(i) Implement "Swachhata Mitr Apke Dwar" scheme in all the regions/areas/wards of the corporation/council/municipality to collect garbage from every home in compliance with Urban Solid Waste (Management & Handling) Rules, 2000.
(ii) A time will be fixed compulsorily in each area to collect garbage from each house. Usually, the time will be from 7.00 to 11.00 in the morning. But the urban body should ensure compliance with the timed fixed for special cleaning. A bell/horn (whose sound must not be over the permissible limit) should be fitted on the tricycle of the garbage collection worker so that the residents can be made aware of collection times.

(iii) The time for garbage collection from commercial establishments/shops shall be from 9.00 to 12.00 in the morning in general.

(iv) The rates for collecting garbage from home under Home Garbage Collection Scheme are fixed as follows:

The above rates will be increased by at least 10 percent every three years.

(v) The charges for door to door garbage collection as above shall be collected only by the authorized institution/person of each ward/area. The above rates shall be properly advertised by the institution/person and the rates shall also be displayed on the rickshaw trolley and auto tipper. The authorized institution/person shall also write the name of the institution/person on the rickshaw trolley and auto tipper.

(vi) The organisation/person in question is supposed to fill submit the duly filled form to the concerned officer or representative in the concerned municipality/municipal council/corporation.

(vii) The slum areas and other empty spaces surrounding hotels/restaurants/office premises/and business and commerce centres, shall be used to collect waste materials. The bio degradable waste disposed by these establishments will be transported from the site, using an enclosed vehicle and will be transported using all the waste transport regulations at the disposal site.

(viii) The waste materials from these containers are not supposed to be handled manually. But, due to some unprecedented circumstances, if the waste material has to be handled and lifted using the manual labour, in such circumstances manual labour would be used with all due care and precautions.

(ix) If the waste material is not disposed by any person on the designated sites, waste bins, litter bins, containers kept on the road, by-passes and parks by the concerned municipal council/corporation and is disposed with the due knowledge by the person elsewhere where waste disposal is prohibited, in such circumstances, carrying charges can be levied by the concerned party.

(x) Municipal authorities can also provide container free waste disposal facility, but in such cases the municipal authorities will have to increase and specify the frequency of lifting the garbage from the locality, so that the surrounding areas and roads are not littered.

8) Transport of the municipal solid waste: - The vehicles used for the transport of solid waste are to be duly closed so that the waste should not be visible to the public and the waste is not scattered elsewhere on the road during transportation, the following standards should be maintained during the transportation of the solid waste.

(i) The solid waste would be collected and cleaned daily from the established waste collectors. Along with the waste, the surrounding area of the disposal site should also be kept clean.

(ii) The design of the transport vehicles will be such that the waste will not be touch until it reaches its final disposal site, and thus the recurring handling of the waste will not happen.

9) Recycling of the municipal solid waste - To make the solid waste created in the areas of Municipal Corporation/ council useful, various solid waste disposal units approved by the pollution control board and different techniques of such solid waste should be applied so that
the dependency of waste disposal on the landfills can be minimised. Following standards should be applied for the expected results:-

(i) For the immobilisation of the bio-degradable waste, various techniques used for degrading the bio waste such as vermicomposting technique, composting, can be used. Also the waste can be degraded using the other natural resources. This can be done using the BOT or O0 method by obtaining the required licenses.

(ii) For the waste material mixed with the renewable resources in the mixture format, the method of recycling should be used. In some cases the resources can be used to generate energy. Such plants with the new technology should be licensed by the pollution control board. The aforementioned plants can be established using the BOT or BOOT method and the licence can be obtained for the same.

10) Municipal Solid Waste Disposal: - In the landfills, non-bio degradable waste which cannot be recycled by any method and the waste which cannot be used as a source of renewable energy should be disposed in the landfill sites. Such materials which are rendered useless after using a part of the same for recycling purposes will be used in landfill sites. In the unavoidable circumstances or, until alternative facilities are established there, the Municipal Corporation/Council/Municipality will be able to do landfill on landfill sites by following the given standards.

11) Prosecution and Penalties: - According to Administration of the solid waste disposal regulations, 2015 by the corporation body, any kind of disobeying and breaching of the said rules and regulations, prosecutions can be rendered according to the Rajasthan Municipal corporation act, 2009. According to the environment regulation act of 1986, some cases can be directed towards them. With this, under the CCA rules, such officers and workers found disobeying the rules will be subjected to the disciplinary actions. This action will be taken by the competent officer. The action will be taken if the said officer is rendered responsible for carrying out his duties irresponsibly.

12) Repeal and saving of Orders: -

(1) After these bylaws are taken into action, the Jaipur solid waste (management and handling) 2005, and also the same bylaws related to the same by other municipal corporations/councils are to be considered as void.

(2) Before these bylaws are taken into action, any actions taken according to the previous bylaws will not be considered as void, due to these bylaws coming into effect, provided that such actions do not violate the bylaws.

(3) Such repealment shall not be affecting any action taken by the municipal corporation before these bylaws.

Such repealment will not affect anything or any action taken, or any acquired or incorporated rights, privilege, obligation or responsibility, approved sanction on going or completed investigation or pending action.
"Schedule - A"

Carrying charges to be levied in case of violation of the bylaws.

Ashok Kumar Singh,

(Principal Joint legal advisor)
subject: Declaring the Ward/City as Open Defecation Free

Many States/States are requesting the Government of India to declare the Ward/City as Open Defecation Free Ward/City. It is also observed that different States/Cities are coming up with different definitions of Open Defecation. To ensure uniformity across the country, following definition is hereby notified for declaring a Ward/City as ODF:

A city/ward is notified as ODF city/ward if at any point of the day, not a single percent of the population is found defecating in the open.

Necessary conditions to be achieved before declaring the city/ward as open defecation free:

1. All households that have space to construct toilet have constructed the one.
2. All occupants of those households that do not have space to construct toilets have access to community toilet within a distance of 500 metres.
3. All commercial areas have public toilets within a distance of one kilometre.
4. Effective mechanisms in place through which they impose fine on the offenders who defecate openly.
5. An electronic log of the city as ODF by the city administration, State should ensure that the claim of the city is verified through third party. The third party protocol will be shared with the States, Ward/City at the earliest by the undersigned.

With regards,

[Signature]
D.O No. Z-11021/04/2016:SBM-II

15th March 2016

Dear Sir/Madam,

Subject: Protocol to be followed for declaration of cities/wards as Open Defecation Free (ODF)

As you are aware, Government of India is implementing the Swachh Bharat Mission (SBM), with the goal of achieving a Clean India by 2nd October 2019. The success of this mission depends on the cleanliness of all the 401 cities and 44,000 wards in India, and wards therein, achieving the status of being Open Defecation Free (ODF).

Following detailed deliberations, a definition for declaring a city/ward as ODF has been issued by the SBM vide letter of even number dated 2nd March 2016. A copy of the same is enclosed, and the definition is reproduced hereunder:

A city/ward is adjudged as ODF-city/ward when no one is found in the open.

Additionally, necessary conditions that have to be achieved before declaring the city/ward as ODF have also been conveyed vide the aforementioned letter.

There is a need for a protocol to be adopted in order to declare a city/ward as ODF to ensure uniformity in implementation of the above definition. It has therefore been decided to utilize the following protocol for declaring a particular city/ward as ODF:

a) All conditions as laid out for ODF city/ward as outlined in para 2 of the DO letter of even number dated 2nd March 2016, have been met by the city/ward.

b) A declaration has been obtained from all wardens of the city without exception of wards as ODF. All wards of the city may at the start declaration to the city municipal administration as per due process. The following sub-declaration have been obtained by the ward in order to facilitate the above said declaration:

- Every section in a ward provides open access to toilets and also furnished a report on complaint of any access to the open.
- Every section in a ward provides open access to waste segregation and disposal systems.
- Once all the above declarations have been obtained from all wards, the city municipal administration shall pass a preliminary resolution declaring the ward to be ODF. Once approved, the declaration shall be made public.

Following such resolution, public objections, if any, are to be intimated to the city municipal administration for necessary action to be taken.

Yours sincerely,

[Signature]

[Name]
e) On receipt of the said communication, the state government may ensure that the claim of the city is verified through an appropriate third-party verification process (in a time-bound process) before formally acceding the city status of being ODF.

With regards,

Yours sincerely,

Dear Sir/Madam,

Subject: Protocol to be followed for declaration of cities/wards as Open Defecation Free (ODF)

As you are aware, Government of India is implementing the 'Swachh Bharat Mission' (SBM) with the goal of achieving a Clean India by 2nd October, 2019. The success of this to a large extent depends on the 4041 cities in India, and wards therein, achieving the status of being Open Defecation Free (ODF).

Following detailed deliberations, a definition for declaring a city/ward as ODF has been issued by the SBM vide letter of even number dated 2nd March 2016. A copy of the same is enclosed, and the definition is reproduced hereunder:

"A city/ward is notified as ODF city/ward if, at any point of the day, not a single person is found defecating in the open."

Additionally, necessary conditions that are to be achieved before declaring the city/ward as ODF have also been conveyed vide the aforementioned letter.

There is a need for a protocol to be adopted in order to declare a city/ward as ODF, so that there is uniformity in implementation of the above definition. It has therefore, been decided to utilize the following protocol for declaring a particular city/ward as ODF:

- a) All conditions as laid out for ODF city/ward, as outlined in para 2 of the DO letter of even number dated 2nd March 2016, have been met by the city/ward.

- b) A declaration has been obtained from all wards of a city, without exception, declaring respective wards as ODF. All wards of a city may make this self-declaration and submit to the city municipal administration as per due process. The following sub-declarations are to be obtained by the ward in order to facilitate the above self-declaration:
  
  i. Every school in a ward provides self declaration that all students enrolled in it have access to, and are routinely using toilets at home and at school.

  ii. Every self-help group active in a ward gives a declaration that all residents of that ward have access to, and are routinely using toilets at home.

- c) Once all the above declarations have been obtained by the respective city municipal administration, from all wards, the city municipal administration may thereafter pass a preliminary resolution declaring the city to be Open Defecation Free. A suitable public announcement may be made for the same as well.

- d) Following such resolution, public objections/feedback may be invited, with a fifteen day timeline. If no substantial objections are received at the end of this time, a final resolution is adopted by the city municipal administration and the same is communicated to respective state governments.
e) On receipt of the said communication, the state government may ensure that the claim of the city is verified through an appropriate third party verification process (in a time bound process) before formally awarding the city status of being ODF.

With regards,

Yours sincerely,

(Praveen Prakash)

To,

Chief Secretaries of all states

Copy to:
1. Municipal Commissioners of 75 cities
2. Mission Directors of all states
3. Secretary/Principal Secretary, Urban Development, of all States
4. Deputy Secretaries (SBM-U)
5. CPHEEO
6. Section
7. SBM-U Website
Dear Sir / Madam,

Ref: Intensive Community triggering for ODF: 19th April 2016

As you are aware, during the initial period of Swachh Bharat Mission (Urban), the focus was on making available sufficient infrastructure / toilet facilities in the long term journey towards achieving Open Defecation Free status. Now that a critical mass of infrastructure has been constructed, and with the pace of construction continuing, it is time to invest in more in-depth engagement with communities to ensure that the toilets constructed are actually used for the purpose they are being provided, and not for any other purpose.

A variety of IEC initiatives have been taken till date (through posters / banners, nukkad natak, citizen engagement through thematic drives and brand ambassadors' engagement, social media engagement etc), the combined impacts of them being heightened awareness about adverse impact of OD, and demand for toilet facilities. To capitalize on the momentum generated in the last one year, it is now necessary to begin longer- term investments in engaging communities, especially in the slum communities, and OD-prone localities.

Interpersonal communication (IPC) and techniques using community participation for collective mobilization, empowering SHGs to take the lead in driving collective behavior change, and using 'Swachhta doors' to trigger and lead behavior change have been found to be very effective in bringing about sustained and long term collective behavior change towards sanitary habits.

Accordingly, further to the notifications of 2nd March' 16 and 16th March' 16 from this office on ODF definition and protocol for ODF verification, you are requested to devote 19th April 2016 to conducting focused community mobilization and triggering exercises, especially near identified OD spots, to demonstrate the fecal-oral transmission route and trigger demand for toilets from the community.

A detailed activity timeline leading up to the 19th April event is provided below, for your reference:

</tr>
<tr>
<td>Following the completion of the exercise, swachhata doots (SDs) are to be selected (based on self-nomination) from among the SHG members. (In case functional SHGs are not available, swachhata doots may be selected (based on self-nomination) from among ASHA workers and Anganwadi workers).</td>
</tr>
<tr>
<td>On completion of the activities, all teams along with the selected swachhata doots will assemble back at the ULB office for debriefing. The reports from each team are to be consolidated and sent to MoUD in the format given below:</td>
</tr>
</tbody>
</table>

**Participatory triggering consolidated report: 19th April 2016**

- No. of OD spots in city / town:
- No. of teams deployed:
- No. of OD spots where community was triggered:
- No. of swachhata doots selected:
  (across all OD spots triggered)
- No. of HHHL applications collected:
  (across all communities near triggered OD-spots)
- No. of households that gave assurance to construct on receipt of funds from ULB:
  (across all communities near triggered OD-spots)
- No. of spots identified for CT construction
  (across all communities near triggered OD-spots)

- The number of swachhata doots selected are to be consolidated, and OD spots allocated. 1 SD will be allocated one particular OD spot in a city / town to convert to ODF in a span of 4-6 months.
Remuneration for SDs: A consolidated amount of ₹5000 may be paid to a swachhata doot, to convert the allocated OD spot to ODF. The payment however may be made in phases:

- 25% of the amount to be paid upfront on selection as swachhata doot (to support his/her daily commutes and expenses).
- 50% of the amount to be paid when the spot becomes ODF (no visible faeces in the spot, nobody found defecating in the open at the spot)
- Balance 25% to be paid 3 months after the spot becomes ODF, subject to the ULB conducting an inspection to evaluate whether the ODF status is being sustained.

Going forward, the training schedule, roles and responsibilities and engagement of swachhata doots will be decided by the respective municipal commissioners. If required, a guideline may be issued from MoUD at a later date on this issue.

The expenses incurred for conducting these activities, including remuneration / incentive for swachhata doots, may be met from your IBC funds.

Please feel free to reach out to me for any queries that you may have. Alternatively, you may contact Shri Madhusudan Sharma (mss2711ud@gmail.com), Dr Ramakant (dr.ramakantud@gmail.com), or Sanghamitra of PMU (sanghamitra@kpmg.com) for any queries / clarifications.

We look forward to your cooperation and motivated leadership to make the Mission a true ‘people’s movement’.

With regards,

Yours sincerely,

(Praveen Prakash)

Sub: Calendar for Thematic Cleanliness Drives as part of Swachh Bharat Mission: April 2016 – March 2017

As you are aware, to celebrate the completion of the first year of Swachh Bharat Mission (Urban), an intensive national cleanliness campaign was started in end-September 2015 as a run up to the first anniversary celebrations from October 2015. A key aspect of that campaign was the launch of fortnightly 'thematic' drives taken up across eleven sectors, between 15th October 2015 – 31st March 2016.

2. It has now been decided to continue the special thematic cleanliness drives every fortnight during 2016-2017 too, across a wider variety of sectors, and involving more number of Ministries. The detailed calendar of thematic activities to be taken up for each fortnight, beginning 1st April 2016, is given in Annexure 1. Some suggested activities for each of the drives are also mentioned in the table.

3. The common outcome components across all drives should be the following:
   a) Community outreach, and uploading of all such community activities and pictures on swachhbharat.mygov.in
   b) Media buzz around each of the thematic drives:
• Each fortnight to have messages from each concerned ministry's Hon'ble Minister being played for the 15 days on FM channels and electronic media
• During each fortnight, constant tweets to go out about activities being undertaken as part of the drive with #MyCleanIndia
• Photocopies of press clips appearing during each thematic fortnights to be uploaded on swachhbharaturban.gov.in portal

4. We look forward to your motivated leadership and cooperation in making the Swachh Bharat Mission a true "people's movement"

Dear Sir/Madam,

Sub: **Swachh Survekshan 2017**

I am glad to inform you that your city will be among 500 cities and towns that will be taken up for the ranking survey “Swachh Survekshan-2017”, under Swachh Bharat Mission. As you are aware, the first round of ‘Swachh Survekshan’ was carried out in January 2016 by the Ministry of Urban Development (MoUD), for 73 cities in India, as part of the mandate of Swachh Bharat Mission-Urban (SBM-Urban). At the time of announcing the results of the first survey, the Urban Development Minister Shri M.Venkaiah Naidu announced that the Swachh Survekshan would become a regular feature of SBM (Urban), across a larger cross-section of cities.

2. The Swachh Survekshan aims to foster a spirit of healthy competition among cities and towns, in terms of emerging as role models for other cities to emulate, on cleanliness and sanitation. I am confident that you would also have aspirations for your city/town to be considered as one of the cleanest cities in India.

3. The Swachh Survekshan, with its three-fold data collection methodology, including feedback from citizens, is a powerful tool for cities and towns to get a realistic measure of their standing on cleanliness parameters, as also helpful for charting out a road map for the city’s development. To reiterate, the objective of this exercise is to bring about overall improvement in the standards of cleanliness in our cities and towns on a lasting basis. A guidelines brochure for Swachh Survekshan-2017 is attached for your reference.
4. While the Swachh Survekshan 2017 will be conducted in January 2017, MoUD will be working with you continuously from June 2016 onwards to ensure that your city is well capacitated and fully geared up to participate in the survey.

I look forward to your support and cooperation in making Swachh Survekshan-2017 a resounding success.

With regards,

Yours sincerely,

(P raveen Prakash)
Joint Secretary & Mission Director (SBM-U)

Guidelines for observing “Swachchha BharatSaptah”

Hon'ble Prime Minister, during his speech on the occasion of 68th Independence Day on 15th August, 2014 from rampant of Red Fort, placed sanitation on the top of Government’s agenda. Besides rolling out program/mission for total sanitation in India, Ministry of Urban Development along with State Governments is going to observe the “Swachh Bharat Saptah” (Clean India Week) during 25th September and 2nd October, 2014 to kick start the cleanliness drive.

Objectives

India is striving hard to achieve cleanliness. It has been aimed to achieve high level of cleanliness across the country through peoples’ participation well before 2nd October, 2019 so as to celebrate 150th birth anniversary of Father of the Nation, Mahatma Gandhi by giving him Swachchha Bharat – as cleanliness was close to his heart.

The objective of the campaign is to achieve the vision of the National Urban Sanitation Policy (NUSP) which is All Indian cities and towns become totally sanitized, healthy and liveable and ensure good public health and environmental outcomes for all their citizens with a special focus on hygienic and affordable sanitation facilities for the urban poor and women.

This campaign aims to create awareness in Government bodies, Non-Governmental Organizations (NGOs) and community at large for their full involvement in achieving the goal of clean India.

Strategy

For observing “Swachh BharatSaptah” (Clean India Week), the entire period available since now, may be divided into two parts viz. Built up Phase for carrying out core work without much publicity and second phase for making publicity and campaigns.

To effectively observe the Swachh Bharat Saptah, State/ULBs should organize focused programmes like street plays, local/ward level awareness programmes, media campaigns, art/literacy competitions, etc. to educate people about the importance of sanitation and the indirect cost to the public from neglecting sanitation in the form of ill-health, loss of work and cost towards medical treatment.

The following strategies may be adopted for planning/organizing campaigns:

A. Constitution of Organizing Committees

At the State Level efforts shall be made by designating some nodal agencies/departments to work-out the strategies for observing “Swachh Bharat Saptah” and necessary directions may be passed on to District Administration/ULBs.

To effectively organize these programmes, two tier committees may be constituted in the
States/UTs (i) at State level under chairmanship of Chief Secretary and (ii) at district level under chairmanship of appropriate authority like Mayor/District Magistrate, as the case may be. The suggestive compositions of Committees are as under:

(i) Steering Committee at the State Level

- Chief Secretary - in the chair
- Pr. Secretary Urban Development - Member
- Pr. Secretary Housing and Urban Poverty Alleviation - Member
- Pr. Secretaries dealing with Education (Basic/Secondary/Higher/Technical) - Member
- Pr. Secretary dealing with Public Health - Member
- Pr. Secretary dealing with Drinking Water Supply & Sanitation - Member
- Pr. Secretary of Transport Department - Member
- Pr. Secretary of Tourism Department - Member
- Pr. Secretary of Power - Member
- Director General/Commissioner of Police - Member
- Information Commissioner - Member
- Director of Local Self Government - Member Secretary
- Committee may co-opt 4 civil society representatives and Pr. Secretary of any other Department, as may be deemed necessary

(ii) Campaign Organizing Committee at District Level

- Mayor in corporation cities at district level - in the chair
- District Magistrate - Co-chair
- Senior Superintendent of Police - Member
- Municipal Commissioner in corporation cities - Member
- District Level Officer of Education department - Member
- District Level Officer of Health department/CMO - Member
- District Level Officer of Drinking Water Supply & Sanitation - Member
- District Level Officer of Transport department - Member
- District Level Officer of Tourism department - Member
- District Information Officer - Member
- Chairman/CEO of ULBs - Member
- Committee may co-opt 4 members from civil society and any other District Level Officer, as may be deemed necessary

In general, the committees may be constituted drawing members from concerned departments in Government/NGOs/civil society/ eminent personalities/public leaders like MPs/MLAs/Councillors etc. and may be notified well before 5th of September 2014 and circulated/intimated to all concerned.

Necessary preparatory meetings may be held between 8th-12th September 2014 and in each committee a nodal officer may be designated to manage/organize the activities related to campaign and do the needful to take forward massive public awareness campaign on cleanliness between 25th September to 2nd October, 2014 with ULBs. It is suggested that
Each of the days of the week, focused sanitation drives may be carried out on one of the thematic areas of sanitation. Some of the suggested thematic areas are as below:

(i) Road & Street Sanitation Day
(ii) Schools & Colleges Sanitation Day
(iii) Hospitals Sanitation Day
(iv) All Toilets Sanitation Day
(v) Institutional Sanitation Day
(vi) Stalls/Hotels/Restaurants/Bakeries/Eateries Sanitation Day
(vii) Day of Sanitation Pledge for all.

B. Wide Publicity of the Event

The committees may make necessary arrangements in place including mobilizing all concerned during 20th – 25th September 2014 for taking forward the public campaign. The information may be spread to public through the following means:

- Print & Electronic media
- Social Network
- Issuing pamphlets
- Recorded voice appeal from dignitaries and public figure like CM, film stars etc. through mobile phones
- SMS
- Broadcasting through radio
- Street plays
- Hoardings/posters/stickers
- Issuing notices to schools
- Distributing cartoons attracting people to observe cleanliness
- Any other means.

The campaign be formally launched on 25th Sept, 2014 in each district by Local M.P./Mayor/District Magistrate or any other dignitary. In this campaign programme for the whole week, as have been drawn above, should be clearly spread out to seek full cooperation of the public. Schools/colleges/institutes of all levels should be fully associated during this campaign. A “Prabhatpneri” or “Short Run for Cleanliness” could be organized in the city/town in association with local Civil Society for building awareness.

Possible activities to be undertaken while observing “Swachhcha Bharat Saptah”

Following activities may be undertaken during the “Swachhcha Bharat Saptah”

1. Building awareness in public at large about the cleanliness of houses/premises
2. Display of message of cleanliness through sign boards at public places/markets.
3. Organizing ‘PrabhatPheries’ in various society/mohallas to create awareness
4. Repair, maintenance, cleaning & sanitization of Public/ Community toilets
5. Cleaning of Bus stands/Roads/Streets/Parks/Markets/Public Places/areas/ backyards/ front yards/areas surrounding the Railway Stations/River/Talab side waste cleaning
6. Cleaning of Toilets in Government buildings/Hospitals/Schools
8. Cleaning of Government Buildings including removal of excess furniture/records/lying in corridors
9. Pledge taking not to litter on road but carry and put at waste collection point and not to spit indiscriminately
10. Educating School children about the importance of sanitation, through distribution of educating material.
12. Organizing Mohalla Sabha where address in this respect may be delivered by a well known person

**Report on Campaign**

State Government may arrange to observe “Swachchha BharatSaptah” between 26th September 2014 and 2nd October 2014 and Director, Urban Local Body may make necessary arrangements to collect and compile all relevant information regarding the no. of events held, participation of public, schools/colleges, and the other efforts made through above stated campaigning means also along the outcome of the events and forward in form of a report to the Ministry of Urban Development by end of October, 2014.
स्वच्छता शपथ

महात्मा गांधी ने जिस भारत का सपना देखा था उसमें सिर्फ राजनैतिक आजादी ही नहीं थी, बल्कि एक स्वच्छ एवं विकसित देश की कल्पना भी थी।

महात्मा गांधी ने गुलामी की जंजीरों को तोड़कर माँ भारती को आज्ञाद कराया।

अब हमारा कर्तव्य है कि गांधी को दूर करके भारत माता की सेवा करें।

मैं शपथ लेता हूं कि मैं स्वयं स्वच्छता के प्रति सजग रहूंगा और उसके लिए समय दूँगा।

हर वर्ष 100 घंटे यानी हर सप्ताह 2 घंटे श्रमदान करके स्वच्छता के इस संकल्प को चारितर्य करूंगा।

मैं न गांधी करूंगा न किसी और को करने दूंगा।

सबसे पहले मैं स्वयं से, मेरे परिवार से, मेरे मुहल्ले से, मेरे गाँव से एवं मेरे कार्यस्थल से शुरुआत करूंगा।

मैं यह मानता हूँ कि दुनिया के जो भी देश स्वच्छ दिखाते हैं उसका कारण यह है कि वहां के नागरिक गांधी नहीं करते और न ही होने देते हैं।

इस विचार के साथ मैं गांव-गांव और गली-गली स्वच्छ भारत भिन्नता का प्रचार करूंगा।

मैं आज जो शपथ ले रहा हूँ, वह अन्य 100 व्यक्तियों से भी करवाऊंगा।"

वे भी मेरी तरह स्वच्छता के लिए 100 घंटे दे, इसके लिए प्रयास करूंगा।

मुझे मालूम है कि स्वच्छता की तरफ बढ़ाया गया मेरा एक कदम पूरे भारत देश को स्वच्छ बनाने में मदद करेगा।
